

Knowledge Bank — Delete / Retire

Hard DELETE entries + existing retire / file deletes

NL-FE-KB-DELETE-001 v1.0 · 22 September 2026

Base: <https://nexus-lexis-backend-ql8w.vercel.app/api/v2>

0. Gap fixed

Articles/Summaries/Judgements previously had Retire only. Hard DELETE /admin/knowledge-bank/entries/:id is restored (library/books trash parity).

Header	Value
Authorization	Bearer <admin JWT>
X-Client-Role	Admin
Content-Type (retire PATCH)	application/json

1. Retire vs Delete

Action	Public	Admin
Retire (soft)	Hidden	Visible under Retired
Hard delete	Gone	Gone
Delete file only	May force draft	Entry remains

2. NEW — Hard delete entry

DELETE /admin/knowledge-bank/entries/:id

Auth: Admin JWT + X-Client-Role: Admin

Query	Default	Meaning
hard	true	Permanent wipe row + PDF
hard=false	—	Soft retire only (status=retired)

```
DELETE /api/v2/admin/knowledge-bank/entries/12
DELETE /api/v2/admin/knowledge-bank/entries/12?hard=true
DELETE /api/v2/admin/knowledge-bank/entries/12?hard=false
```

```
Response 200 (hard):
{ "success": true, "data": { "id": "12", "deleted": true, "hardDeleted": true } }
```

```
Errors: 401 · 403 · 404
```

Pillar-agnostic by id (articles, summaries, judgements). Removes DB row + stored PDF; public lists drop immediately; admin counts update.

3. Existing — keep as-is

```
PATCH /admin/knowledge-bank/entries/:id/status
{ "status": "retired" } // also draft | published
```

```
DELETE /admin/knowledge-bank/entries/:id/file
→ hasFile=false, status=draft; row remains
```

4. All KB delete surfaces

Resource	Method / Path
KB entry hard (NEW)	DELETE /admin/knowledge-bank/entries/:id
KB entry file	DELETE /admin/knowledge-bank/entries/:id/file
KB entry retire	PATCH .../entries/:id/status { retired }
Library template hard	DELETE /admin/library/templates/:idOrSlug?hard=true
Library draft	DELETE /admin/library/drafts/:id
Law book hard	DELETE /admin/knowledge-bank/books/:idOrSlug?hard=true
Law book file	DELETE /admin/knowledge-bank/books/:idOrSlug/file

5. FE swap

UI	API
Archive / Retire	PATCH .../status { retired }
Trash (confirm)	DELETE .../entries/:id
Remove PDF only	DELETE .../entries/:id/file

6. Acceptance

Check	Status
Hard DELETE published entry + PDF → public gone	Shipped
Retire independent of hard delete	Shipped
404 / 401 behaviour	Shipped
Same route for all three pillars	Shipped
