

FRONTEND API CHANGELOG

Admin Appointment Oversight

Extend Admin → Appointment Oversight: paginated list, stat cards, detail drawer, reassign, assignable professionals. Same appointment rows as Client/Lawyer.

Document ID NL-FE-ADMIN-OVERSIGHT-001

Version 1.0 · Date 13 August 2026

Extends NL-FE-ADMIN-APPT-001 · Demo admin@nexuslexis.law / admin123

PRODUCTION BASE

<https://nexus-lexis-backend-ql8w.vercel.app/api/v2>

1. Changelog

Added

Method	Path	Purpose
GET	/admin/appointments/stats	Stat cards
GET	/admin/appointments/:id	Detail drawer (timeline + audit)
POST	/admin/appointments/:id/reassign	Assign another professional
GET	/admin/assignable-professionals	Assign Lawyer modal list

Updated

Method	Path	Change
GET	/admin/appointments	Paginated + filters + nested payment/assignment/meeting

Unchanged

Client POST/GET /appointments, Lawyer inbox, custom-docs deliver, and PATCH /admin/appointments/:id status aliases.

2. Auth

```
Authorization: Bearer <adminJWT>
X-Client-Role: Admin
// RegistryStaff also accepted with mock JWT
```

3. GET /admin/appointments — paginated list

Param	Notes
page, limit	limit: 10 20 50 (default 20)
search	id, client name/email, professional name
status	pending, confirmed, completed, cancelled, ...
paymentStatus	paid, pending, failed, refunded
assignmentStatus	assigned, reassignment_required, ...
mode	video, in_person, phone, document
attentionOnly	true → attentionFlags.length > 0
source	consultation custom_docs

```
{
  "success": true,
  "appointments": [ /* oversight item */ ],
  "pagination": {
    "page": 1, "limit": 20, "totalItems": 137,
    "totalPages": 7, "hasNext": true, "hasPrev": false
  }
}
```

Reuse Library `CatalogPagination` — same shape.

4. Oversight appointment object

Nested: `client`, `professional`, `payment`, `assignment`, `meeting`, `attentionFlags`, `acceptanceDeadline`, `acceptanceExpired`.

Flat aliases kept: `clientName`, `professionalName`, `lawyerName`, `timeSlot`, `brief`.

Field	Values
statusKey	pending, confirmed, in_progress, completed, cancelled, rescheduled, no_show
payment.status	paid, pending, failed, refunded
assignment.status	assigned, pending_assignment, reassignment_required
attentionFlags[]	payment_issue, pending_confirmation, reassignment_required, acceptance_expired, ...

5. GET /admin/appointments/stats

```
{
  "success": true,
  "stats": {
    "total": 137, "pending": 42, "confirmed": 31, "today": 5,
    "completed": 48, "cancelled": 11,
    "needsReassignment": 3, "revenue": 1250000
  }
}
```

6. GET /admin/appointments/:id

Full object with `timeline[]` and `audit[]` for the drawer. 404 if unknown.

7. PATCH /admin/appointments/:id

UI	PATCH body	statusKey
Accept	Accepted	confirmed
Reject	Rejected	cancelled
Complete	Completed	completed
No-show	no_show	no_show
Reschedule	rescheduled + slot/date	rescheduled

8. POST /admin/appointments/:id/reassign

```
POST /admin/appointments/14/reassign
{
  "professionalProfileId": "11",
  "professionalType": "lawyer",
  "note": "Acceptance window expired"
}
```

Resets status to pending, restarts acceptance window, updates lawyer inbox (old drops, new sees it). 400 invalid · 409 slot clash · 404 unknown.

9. GET /admin/assignable-professionals

Query: professionalType, practiceArea, city, excludeProfileId, search.

10. Frontend checklist

#	Check
1	Replace adminAppointmentsMock with GET /admin/appointments
2	Stat cards → GET /admin/appointments/stats
3	Drawer → GET /admin/appointments/:id
4	Assign modal → assignable-professionals + POST .../reassign
5	Status buttons → PATCH /admin/appointments/:id
6	Same pagination component as Library
7	Do not call GET /lawyer/appointments from Admin
