

FRONTEND PRODUCT FLOW

Document Library

Start → End

How Admin publishing, Knowledge Bank, Paid Library, My Documents, author identity, and Custom Drafts connect as one module.

Document ID NL-FE-LIB-FLOW-001

Version 1.0 · Date 22 August 2026

Companions NL-DOC-LIB-002 · NL-FE-LIB-AUTHOR-001 · NL-DOC-APPT-001

PRODUCTION BASE

<https://nexus-lexis-backend-ql8w.vercel.app/api/v2>

1. Four tracks, one module

Track	Who	Outcome
A. Admin publishing	Admin	Templates live as paid or public
B. Knowledge Bank	Anyone	Free device download (not My Documents)
C. Paid Library	Client	Buy → pay → unlock in My Documents
D. Custom draft	Client + lawyer	Request → deliver → My Documents

IDENTITY Author identity is always `lawyerProfileId`. Display names can collide — never assign by name alone.

2. Component map

Component	Role
Admin Library	Categories + template CRUD; soft activate
Find a Lawyer	Verified <code>lawyerProfileId</code> + email + photo
Knowledge Bank	Public free catalog + device download
Client Library	Paid catalog, sample, purchase + complete
My Documents	Paid unlocks + custom-draft delivers
Custom requests	Book drafting on author id
Lawyer deliver	Upload finished draft into My Documents

3. Track A — Admin publish

1. Login Admin
2. GET `/admin/library/categories`
3. GET `/lawyers/public` → pick `lawyerProfileId`
4. POST `/admin/library/templates` (file + `accessType` + `lawyerProfileId`)
5. paid → Library catalog · public → Knowledge Bank
6. PUT/PATCH { `isActive` } or DELETE (soft deactivate)

4. Track B — Knowledge Bank (free)

- ```
GET /knowledge-bank/catalog
GET /knowledge-bank/templates/:slug
GET /knowledge-bank/templates/:slug/download
→ file to device only · never My Documents · no login
```

5. Track C — Paid Library → My Documents

```

GET /library/catalog?page=&limit=
GET /library/templates/:slug
 optional sample: GET .../sample
POST /library/templates/:slug/purchase { couponCode? }
POST /library/purchases/:orderNumber/complete
GET /documents
GET /documents/:orderNumber/download

```

Unpaid download → 402. Old POST .../templates/:slug/download → 410 Gone.

## 6. Track D — Custom draft

```

Template card → lawyerProfileId
POST /documents/custom-requests
 { lawyerProfileId, source: custom_docs, mode: document, ... }
→ Lawyer GET /lawyer/appointments (assignee only)
→ PATCH status · POST .../deliver (file)
→ Client My Documents download

```

CUSTOM DOC Missing/invalid lawyerProfileId → 400. Do not fall back to another lawyer with the same name.

## 7. My Documents sources

| source           | How it arrives                         |
|------------------|----------------------------------------|
| library_purchase | Paid buy + complete                    |
| custom_docs      | Lawyer deliver on drafting appointment |
| other orders     | Classic service order flow             |

## 8. Decision cheat-sheet

| Question             | Answer                                  |
|----------------------|-----------------------------------------|
| Free vs paid?        | accessType public → KB · paid → Library |
| Where free file?     | Device only                             |
| Where paid file?     | My Documents after complete             |
| Who is author?       | lawyerProfileId on template             |
| Custom assignee?     | Same lawyerProfileId on request         |
| Reactivate template? | PUT/PATCH { isActive: true }            |

## 9. Frontend checklist

| # | Check                                                      |
|---|------------------------------------------------------------|
| 1 | Admin publish sends lawyerProfileId; catalog echoes it     |
| 2 | Knowledge Bank never writes My Documents                   |
| 3 | Paid: catalog → purchase → complete → documents → download |
| 4 | Handle owned / alreadyOwned on cards                       |
| 5 | Custom Doc locks assignee from template lawyerProfileId    |
| 6 | Shared pagination for Library + My Documents + Admin       |

| # | Check                                                      |
|---|------------------------------------------------------------|
| 7 | Do not call removed POST /library/templates/:slug/download |
