

FRONTEND API CHANGELOG

Library Author Identity

Persist lawyerProfileId on templates, echo id/email/picture on public directory and lawyer profile, honour isActive activate, and assign custom-docs by id only.

Document ID NL-FE-LIB-AUTHOR-001

Version 1.0 · Date 15 August 2026

Backend CR NL-BE-LIB-AUTHOR-001

PRODUCTION BASE

<https://nexus-lexis-backend-ql8w.vercel.app/api/v2>

1. Changelog

Area	What changed
GET /lawyers/public	id, lawyerProfileId, email, image/photoUrl/profilePicture
GET /cas/public	id, caProfileId, email, picture fields
GET /lawyer/profile	id, lawyerProfileId, email, picture fields
POST /lawyer/profile/photo	Persists photo; returns photoUrl aliases
Admin library templates	Store + echo lawyerProfileId; PUT/PATCH isActive
Custom-docs	lawyerProfileId required — no name-only assign

IDENTITY Display names collide (two “Matti Ullah”). Always key off lawyerProfileId — never name alone.

2. Public directory

```
GET /api/v2/lawyers/public
{
  "id": "13",
  "lawyerProfileId": "13",
  "name": "Matti Ullah",
  "email": "matti13@nexuslexis.law",
  "image": "...", "photoUrl": "...", "profilePicture": "..."
}
```

Null email → show “Email not listed”. Picture aliases are the same URL.

3. Library template author

Create/update accept lawyerProfileId (aliases lawyerId, authorProfileId). Unknown verified id → 400. Catalog/detail echo all three id fields.

```
{
  "lawyer": "Matti Ullah",
  "author": "Matti Ullah",
  "lawyerProfileId": "13",
  "lawyerId": "13",
  "authorProfileId": "13",
  "isActive": true
}
```

Drop the temporary credit string Name · #13 once this is live.

4. Activate / deactivate

Call	Effect
DELETE /admin/library/templates/:id	Soft deactivate (isActive false)
PUT/PATCH ... { isActive: true }	Reactivate — appears in public catalog

5. Custom docs

```
POST /api/v2/documents/custom-requests
{ "lawyerProfileId": 13, "lawyerName": "Matti Ullah", "source": "custom_docs" }
// Missing/invalid id → 400. Name is label only.
```

6. Checklist

#	Check
1	Find a Lawyer shows id + email + picture
2	Publish template with lawyerProfileId — catalog echoes it
3	Custom Doc assigns that id (not another same-name lawyer)
4	Admin Activate via isActive true works
5	Photo upload persists and returns on profile GET
